

PROJECT LIFE MANAGEMENT (PLM)
EFOP-5.2.2-17-2017-00018
REPORT ON THE FOURTH FIELDWORK
30.11.2018
ZAGREB

The fieldwork was organised in Zagreb, with the “hosts” being our two partner organisations, CEDEX and the Faculty of Economics and Business of the University of Zagreb.

The participants of the fieldwork were the EUROPÉER Foundation, the Croatian partner organisations’ representatives, and those of interested organisations and institutions.

The fieldwork started with representatives introducing themselves to each other. After this, the representative of the foundation held a short introductory, in which the Project Life Management concept was introduced.

The Croatian partners held two presentations as part of the fieldwork. The first presentation – Project management tools in everyday life – detailed the results of the Croatian research report. The second presentation was focused on private life project management education in public education’s system.

The presentations were followed by panel discussions, during which the participants discussed the contents of said presentations and related topics.

During the panel discussion, the participants focused on applied practice methods, best practices being shared, and implementation at certain organisations being cooperated.

The fieldwork was also a good opportunity to build and deepen international relations.
