

DETAILS OF THE FOURTH WORKSHOP OF 2019

GYŐR

The Győr workshop was held in the Mobilis Interactive Exhibition Centre, where the participants were the representative of the EUROPÉER Foundation, the representatives of the Romanian partner organisation Pro Oeconomica, and most notably, members of the Mobilis team.

The Mobilis Centre offers several programmes for the visitors, from the youngest to the elderly, almost for every age bracket. Programmes include several thematic, mainly technical competences' development programmes, competence development programmes, etc. aimed at children in school age.

The central topic of the workshop was the opportunity to introduce project management perspective and toolset during the school age.

The workshop started with the introduction of the participants, then went on to presentations detailing

- the transnational programme
- the PLM programme
- the Romanian experiences of project management education in school.

Following this, the participants discussed the domestic schools' project management education, experiences related to it, and the general opportunities, challenges and conditions of introducing the project management in education as part of a discussion. Furthermore, they held a general overview of education outside of school, and its conditions.

During the second part of the workshop, participants – through questions – obtained a more detailed information scope on the PLM Programme, and its usability.

During the workshop, the employees of Mobilis shared their education programmes' experiences, most notably in grade- and middle school.

Participants discussed the opportunities of integrating the PLM Programme into the services of Mobilis, and its conditions. There was also a discussion on opportunities for joint ventures.

The workshop made it possible to create and strengthen international relations as well, building a cooperative network.
