

## DETAILS OF THE THIRD FIELDWORK OF 2019

### MISKOLC

The location of the fieldwork was Miskolc, where the Miskolc HR Club was founded and holds gatherings every two months. The goal of founding the Miskolc HR Club was to create a strong professional circle by linking the theoretic and practice experts, sharing experiences, sharing knowledge, and organising conferences, workshops and other HR events in Miskolc.

Local NGOs and companies dedicated to responsibility and CSR, furthermore (according to the participant roster) the representatives of the EUROPÉER Foundation, the representative of the Slovakian partner organisation Dr. József Poór, and the representative of the Romanian partner organisation Kinga Kerekes were present during the 02.05. gathering of the club.

The event made an opportunity to hold a detailed introduction of the Project Life Management Programme, where the host organisations mapped possible cooperation initiatives. The local NGOs and firms discussed about the current most notable issue of the labour situation – reasons for the lack of educated labour. The PLM Programme is happy to join this topic, as it offers a complete system through organisational courses which may help people to learn key competences necessary for labour market integration and opportunities.

Furthermore, the representatives of the Foundation introduced the courses for the PLM Programme's social responsibility towards special target groups, the most disadvantaged of society. These aim to offer them an equal chance, and possibility of integration through the toolset and methods of project management.

The fieldwork made it possible to create and strengthen international relations as well, building a cooperative network.
