

DETAILS OF JOINT PROFESSIONAL PROGRAMMES WITH PARTNERS

LILLAFÜRED

Following the Project Life Management Conference in Lillafüred, 15. 10. 2019, the EUROPÉER Foundation and the foreign – Slovakian, Romanian, Croatian – partners' representatives held a joint professional event where they discussed the experiences and aftereffects of the conference.

About the presentations of the conference, everyone was positive, while the domestic and foreign experiences, shared information and knowledge once again proved that

- in case the individual learns about the positive effects of using awareness as early as possible for all areas of life, they can live a balanced everyday life
- project management tools and methods are adaptable to everyday life, and managing private projects
- there's a widely acclaimed realisation that our education and training systems need a full paradigm shift, which could be based on the private application of project management, and in raising society for awareness.

Furthermore, participants discussed the preparations for the closing process, evaluated the milestones and conclusion of the project actualisation. About the project closure and evaluation, participants discussed the activities conducted and failed, did a detailed analysis about how much the goals were realised by the end of the project. They listed all the events and the timeframes, the financial and other issues. They discussed if they managed to realise their goals in the quality they wished to, if they found tools which could aid them in executing their tasks, and if they used the proper communication channels.

The event's participants all disclaimed that they wish to cooperate in the future, and evaluated the opportunities to do so.
